

Technical Note Subject	VersaVote program malfunctions caused by the MS update “KB982158”		
doc #	release date	replace	notes
TN100708	2010-07-08		

KB982158 is a security update for MS Office PowerPoint 2007. This will cause VersaVote program unable to refresh the chart right after voting. Before newer program addressing the issue becoming available, a straight forward solution is to remove the “KB982158”.

Only VersaVote running in PowerPoint 2007 has the issue. VersaVote running in PowerPoint 2002, 2003, 2010 are not affected.

Below example shows how to remove the KB982158 under Window 7 platform.
